**SPECIALISTS IN MANUFACTURING AND DISTRIBUTION**

### **Automatic Master Schedule Updating**

If authorized by the user, a sales order shipment will automatically relieve the master schedule based on the part number being shipped, and if specific customers are specified in the master schedule, the exact customer master schedule entry will be updated.

In conjunction with the system's ability to automatically maintain sales forecasts based on sales order entries, the automatic master schedule updates will maintain a reasonable basis for a continuous DRP or MRP planning process.
